

B1

4.(Once Amended) The computer method of claim 32 wherein said ordering interface access providing step further comprises providing access to a customer proofbook adapted to store a subset of said electronic photographic images, wherein said customer proofbook persists between said remote accesses by said customer.

5.(Once Amended) The computer method of claim 32 wherein said server access providing step enables transmitting payment corresponding to production of said hardcopy renditions in response to notification from said financial institution.

6.(Once Amended) The computer method of claim 32 wherein said server access providing step enables receiving said electronic photographic images from a transmission over a publicly accessible network through said communications link.

7.(Once Amended) The computer method of claim 32 wherein said server access providing step enables receiving said electronic photographic images from a non-volatile digital media.

B2

10.(Once Amended) The method as in claim 33 wherein said translating comprises scanning a visual image into a digital storage format.

11.(Once Amended) The method as in claim 33 wherein said fixing comprises using a digital camera to store said visual images therein.

12.(Once Amended) The method as in claim 33 wherein said displaying to said remote customer and said receiving said order comprises a transmission over a publicly accessible network.

B3

15.(Once Amended) The method as in claim 33 wherein said storing further comprises arranging said electronic photographic images according

to an event and said displaying said electronic photographic images occurs selectively according to said event.

cont
B3

16.(Once Amended) The method as in claim 33 wherein said displaying is followed by the step of electing a quantitative and qualitative assertion for at least one of said electronic photographic images.

B4

19.(Once Amended) The method as in claim 33 wherein said receiving said order comprises a qualitative and quantitative election with respect to each of said electronic photographic images of said subset.

20.(Once Amended) The method as in claim 33 wherein said storing is preceded by the step of remotely altering said electronic photographic images.

B5

23.(Once Amended) The computer method of claim 34 wherein said ordering interface access providing means further comprises means for providing access to a customer order selector adapted to enumerate and quantify a subset of said electronic photographic images to be produced as said hardcopy renditions.

24.(Once Amended) The computer method of claim 34 wherein said ordering interface access providing means further comprises means for providing access to a customer proofbook adapted to store a subset of said electronic photographic images, wherein said customer proofbook persists between said remote accesses by said customer.

25.(Once Amended) The computer method of claim 34 wherein said server access providing means further comprises means for transmitting payment corresponding to production of said hardcopy renditions in response to notification from said financial institution.

B5

26.(Once Amended) The computer method of claim 34 wherein said server access providing means further comprises means for receiving said electronic photographic images from a transmission over a publicly accessible network through said communications link.

27.(Once Amended) The computer method of claim 34 wherein said server access providing means further provides means for receiving said electronic photographic images from a non-volatile digital media.

B6

30.(Once Amended) The method of claim 32 further including the step of providing access to stored images for allowing image editing.

31.(Once Amended) The method of claim 32 wherein said editing step includes one or more of the steps of categorizing, sorting and titling.

Please add new claims 32, 33 and 34.

B7.

32.(New) A computer method for storing and saving electronic photographic images comprising:

- providing access to a server having picture memory adapted to store said electronic photographic images obtained by a photographer at a customer event, an ordering interface and a communication link, said server providing access to said electronic photographic images stored in said picture memory, said ordering interface further providing access to an image profiler adapted to sequence and label said stored electronic photographic images;
- said server adapted to transact remote payment information with respect to a financial institution for verifying payment of an order placed through said ordering interface; and
- wherein said ordering interface is operable to be remotely accessed by said customer of said photographer for the purpose of ordering an image product with respect to said stored electronic photographic images,.

33.(New) A method of remotely uploading, storing, reviewing, and editing electronic photographic images comprising:

fixing visual images on a persistent medium;

translating said visual images into electronic photographic images;

transmitting said electronic photographic images to an order server;

sequencing and captioning said electronic photographic images;

storing said electronic photographic images on a memory at said order server;

displaying selected electronic photographic images from said memory to a remote customer;

receiving an order from said remote customer enumerating a subset of said electronic photographic images; and

producing a hardcopy rendition of said subset of electronic photographic images.

34.(New) A computer method for storing and saving electronic photographic images comprising:

means for providing access to a server having picture memory adapted to storing said electronic photographic images obtained by a photographer at a customer event, an ordering interface and a communication link, said server accessed to said electronic photographic images stored in said picture memory, said ordering interface further providing access to an image profiler adapted to sequence and label said stored electronic photographic images;

said server adapted to transact remote payment information with respect to a financial institution for verifying payment of an order placed through said ordering interface; and

wherein said ordering interface is operable to be remotely accessed by said customer of said photographer for the purpose of ordering an image product with respect to said stored electronic photographic images.
